The Steinberg Law Group has decades of proven experience and the resources to help victims of asbestos exposure and their families obtain the financial compensation they deserve. All of it.

The Steinberg Law Group has decades of experience in handling mesothelioma and other asbestos-related cases. With offices in New York, California and Texas, the Steinberg Law Group has a national footprint that helps win the best possible financial compensation for clients. www.mesotheliomaoptions.com

Typically, asbestos exposure will have occurred sometime between the 1950s and the 1980s. Some of the most prevalent professions that encountered large quantities of asbestos include power plant workers, maritime workers, industrial workers, plumbers, pipefitters, electricians, mechanics, machinists, miners, railroad workers and construction workers, to name a few. Since the latency period for mesothelioma patients is approximately 40 years, most people diagnosed with mesothelioma or asbestos-related lung cancer in 2022 were exposed decades ago. www.mesotheliomaoptions.com

Unfortunately, multiple vermiculite processing plants in Wyoming received asbestos-contaminated vermiculite from the notorious mine in Libby, Montana. In addition, Wyoming contains 12 known natural asbestos deposits. Residents of the state who worked in oil refineries, power plants and chemical plants are at an elevated risk of developing mesothelioma or asbestos-related lung cancer.
