Two types of perfumes are essence and perfume. They are used to enhance the scent of an object or person. The origins of perfume are believed to have been in the anti-rotting flesh smell. Perfume is used for many purposes, including personal hygiene and socializing. Essence and perfume are essences that add a specific scent to perfumes. A variety of oils and essences make up perfumes. These are combined to create the desired scent. Depending on the type, some essences are more frequently used than others.
