BURLINGAME, CALIFORNIA , UNITED STATES, December 19, 2022

/EINPresswire.com/ -- To calculate the current market size of the [Micro Packaging Market](#), the research used four main methods. Extensive secondary research has been conducted to learn more about the market and its various sub-segments. In the next phase, we conducted primary research to validate these findings, estimates, and sizing with

industry experts along the value chain. Both top-down and bottom-up strategies were used to evaluate the overall market size. Market breakdown and data triangulation were then used to calculate the market size for each segment and its sub-segments.

Micro packaging has been employed in food, beverages, and pharmaceutical industries. The leaking of oxygen into the package results in increased rate of oxidation, which will reduce the shelf life of the product. Also, contamination from dust and pathogens will affect food quality. An alternative to micro packaging is coating of metal or glass on the packaging, but this will result in reduced flexibility.
