## Recent Development of Global Physical Therapy Market

In April 2020, ATI Physical Therapy, a privately held, nationally recognised healthcare organisation based in the United States that specialises in outpatient rehabilitation and related healthcare services, has introduced a virtual or online physical therapy service.

## Global Physical Therapy Market Overview:

Physical therapy is a term that refers to a variety of procedures used to relieve pain and restore mobility to injured human body parts like limbs and joints. It gives those with serious musculoskeletal and neuromuscular issues, whether acquired or inherited, a new lease on life. It's also administered to patients after procedures like joint replacement and muscle restoration, in which a bodily portion is immobilised for an extended length of time. Since medical improvements have boosted the survival rate of premature infants and trauma and stroke victims, the demand for evaluation and treatment of their biophysical disorders has grown. This is propelling the global physical therapy services market to new heights.

Physical therapy is a type of treatment that employs practises such as exercise, massage, and others to alleviate any sickness or wound. Geriatric physical treatments, cardiac and pulmonary physiotherapy, neurological physiotherapy, and other sorts of fleshly therapies are some of the most common.
