

Drone U Announces Relocation of Corporate Headquarters to Loveland, Colorado

The online and in-person drone training company is excited to bring their headquarters and employees to Northern Colorado.

LOVELAND, CO, UNITED STATES,
December 20, 2022 /

EINPresswire.com/ -- Drone U, an [online drone pilot training platform](#), has announced the relocation of their corporate headquarters to Loveland, Colorado. The company was previously based out of Albuquerque, New Mexico

“We are incredibly excited to be an active part of not just the drone community, but the entire Northern Colorado community,” Drone U CEO Paul Aitken said. “Our students come from all over the world to train with us, both online and in person, and we are delighted to be able to host them in beautiful Loveland, Colorado.”

Drone U will relocate its team and state-of-the-art drone flying training center to Loveland, Colorado. Through in-person and online drone courses, the school has trained nearly 20,000 pilots since its founding in 2014.

Drone U's online training provides unlimited access to all of their drone flying courses, webinars and drone training modules for \$57 per month ([reduced pricing is available for students and veterans](#)). Drone U's suite of courses teaches everything from the basics of drone flying through advanced maneuvers used by professional videographers. They also provide specific training such as FAA Part 107 test prep, complex photogrammetry and 3D modeling.

Have fun and learn to fly with confidence on the Drone U Obstacle Course

In addition to Drone U, the company recently launched PROPS, which stands for [Professional Reliable Operators Practicing Safety](#). This enterprise-level platform is designed specifically for larger teams of drone operators as well as for organizations whose pilots are spread out geographically. Through this platform, drone program managers can effectively manage their pilots' education to evaluate proficiency, efficiency and effectiveness, while also recognizing when additional training may be necessary to achieve their corporate goals and objectives.

Drone U CEO Paul Aitken teaches a class on drone safety

The company also has a top drone industry podcast designed to help drone pilots by answering their questions. To date the Ask Drone U podcast has had nearly 4.5 million listens over approximately 1,400 episodes. The podcast can be found on all normal distribution channels or at askdroneu.com.

“

Our students come from all over the world to train with us, both online and in person, and we are delighted to be able to host them in beautiful Loveland, Colorado.”

Paul Aitken, CEO
