Veterinary Parasiticides Global Market Report 2022 –
Market Size, Trends, And Global Forecast 2022-2026

As per The Business Research Company's "Veterinary Parasiticides Global Market Report 2022",

“Avail a limited period discount of 33% on our uniquely designed Opportunities and Strategies market research reports. Contact us today and make winning strategies!”

The Business research company

the veterinary parasiticides market grew from \$2.48 billion in 2021 to \$2.69 billion in 2022 at a compound annual growth rate (CAGR) of 8.7%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The [global veterinary parasiticides market size](#) is expected to grow to \$3.25 billion in 2026 at a CAGR of 4.8%. Animals are increasingly being affected by zoonotic pathogens, which are the leading cause of foodborne diseases worldwide.

Key Trends In The Veterinary Parasiticides Market

Chewable tablets are being used to prevent animals from being affected by ticks, worms, fleas, and others. Treatments with these tablets are easier to administer. The chewable tablets are

available in either a beef-flavored tablet or soft chew.

Overview Of The Veterinary Parasiticides Market

The veterinary parasiticides market consists of sales of veterinary parasiticides and related services which are used in the treatment of parasitic diseases in livestock, pets, and other animals. The veterinary parasiticides industry includes establishments that produce a cure to parasitic diseases that can be caused by helminths, amoeba, ectoparasites, parasitic fungi, and protozoa. Veterinary parasiticides are chemical substances that destroy or inhibit micro-organisms or parasites and improve the animals' health.
