Drivers

Rising demand for non-invasive dermatological actions

The growing global dermatology devices market is mainly driven by the growing incidence of skin problems, including acne important to scars, growing demand for at-home devices, and substantial increase in non-invasive liposuction actions and a growing large population. The global market for dermatology devices is expected to witness a significant growth rate due to a growing alertness of aesthetic medicine and cosmetic surgery, growing fashion consciousness, and the rising demand for non-invasive cosmetic correction procedures.

Growing healthcare expenditure

Growing geriatric populace rising disposable income is creating high probable growing chances for players functioning in the global dermatology devices market.

Specialty Dermatology Clinics end user segment

The speciality dermatology clinics segment is projected to account for a 36.2% revenue portion of the worldwide dermatology devices market by 2016. Amount of patients favoring private clinics over hospitals has been growing over the years, as supplementary costs such as organization costs are not related with private clinics.

High demand for skin rejuvenation

For reducing inadequacies on the skin and decreases the effect of aging, sunburn, and other skin disorders used laser and light procedures for skin rejuvenation include photodynamic surgery and non-ablative skin rejuvenation. A increase in alertness concerning the advantage of cosmetic actions to recover the aesthetic demand of consumers is expected to boost the growth of the dermatology devices market.

Opportunities

The increasing occurrence of skin cancer and other skin diseases is contributing largely to the high product demand. Also, the increasing awareness among people about the aesthetic appeal and technological progressions in dermatology devices is also increasing the adoption of these devices. A rise in disposable income is also measured as one of the important factors driving the growth of market. The occurrence of melanoma and non-melanoma skin cancers is rising meaningfully.
