Key Market Analysis and Insights:

Services related to fertility are ones that are offered to help in infertility treatment. These services use methods such as in vitro fertilisation (IVF), artificial insemination, surrogacy, and others to aid couples, single mothers, and members of the LGBT community who are having trouble getting pregnant. Men and women of childbearing age can both experience infertility. Additionally, reduced sperm counts or decreased sperm motility, which may be caused by hormonal imbalance, are primary causes of male infertility. Therefore, the hypothalamus and pituitary gland must work properly for both men and women to be fertile.

Data Bridge Market Research analyses that the fertility services market which was USD 17.45 billion in 2021, would rocket up to USD 31.59 billion by 2029, and is expected to undergo a CAGR of 7.70% during the forecast period 2022 to 2029. In addition to the market insights such as market value, growth rate, market segments, geographical coverage, market players, and market scenario, the market report curated by the Data Bridge Market Research team also includes in-depth expert analysis, patient epidemiology, pipeline analysis, pricing analysis, and regulatory framework.
