Retail And Wholesale Global Market Report 2022 –  
Market Size, Trends, And Global Forecast 2022-2026

As per The Business Research Company's "[Retail And Wholesale Global Market Report 2022](#)", the retail and wholesale market grew from \$65,710.76 billion in 2021 to \$71,531.46 billion in 2022 at a compound annual growth rate (CAGR) of 8.9%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The retail and wholesale market is expected to grow to \$91,898.73 billion in 2026 at a CAGR of 6.5%. Many retailers and wholesalers are adopting a robust and cohesive strategy for data analytics in management.

Key Trends In The Retail And Wholesale Market

The retail and e-commerce markets are increasingly investing in drones to reduce delivery times and increase profitability. A drone is an unmanned aerial vehicle (UAV) that is remotely

controlled or flies autonomously using software-controlled flight plans in its systems. Using a drone for delivery allows retailers to cut costs and help provide customers with their products earlier than traditional delivery methods.

### [Overview Of The Retail And Wholesale Market](#)

The retail and wholesale market consists of sales of retail and wholesale services and related goods by entities (organizations, sole traders, and partnerships) that together provide the service of making goods available in convenient quantities and locations. Retailers are independent organisations in the distribution channel for consumer goods that buy goods from wholesalers or direct from producers; break bulk; store goods; display goods for sale either physically or online; sell to ultimate users; and sometimes deliver. Wholesalers are independent organisations in the distribution channel for consumer goods that buy in bulk, store goods, break bulk, and sell merchandise primarily to retailers, professional authorities, or to other wholesalers rather than to consumers. Both retailers and wholesalers take ownership of the goods and so bear the risk of carrying inventory. They also reduce the total number of transactions required for the process of transferring goods from producers to consumers.
