food encapsulation market is expected to grow from \$34.25 billion in 2021 to \$36.33 billion in 2022 at a compound annual growth rate (CAGR) of 6.07%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The food encapsulation market is expected to reach \$46.10 billion in 2026 at a CAGR of 6.12%. The rising demand for fortified and functional foods is expected to propel the growth of the food encapsulation market.

## Key Trends In The Food Encapsulation Market

Technological advancement is a key trend gaining popularity in the food encapsulation market.

Technological advancement is the discovery of knowledge that advances technology.

## Overview Of The Food Encapsulation Market

The food encapsulation market consists of sales of food encapsulation products by entities (organizations, sole traders, and partnerships) that are used for incorporating food ingredients, cells, enzymes, and certain other materials into small capsules. The food encapsulation technique is widely used in the food industry, as the encapsulated materials are protected from heat, moisture, or other extreme conditions. Food encapsulation is used to mask taste, color, flavor, and odor, and enhance the viability and stability of the food product.
