aircraft landing gear market is expected to grow from \$10.77 billion in 2021 to \$11.56 billion in 2022 at a compound annual growth rate (CAGR) of 7.34%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. As per TBRC's aircraft landing gear market research the market is expected to reach \$16.06 billion in 2026 at a CAGR of 8.57%. The increasing procurement of modern generation aircraft is expected to propel the growth of the aircraft

landing gear market.

Overview Of The Aircraft Landing Gear Market

The aircraft landing gear market consists of sales of landing gear by entities (organizations, sole traders, and partnerships) that is used in both takeoff and landing of aircraft. Aircraft landing gear is the undercarriage of an aircraft that supports the aircraft to take off, land, and taxi without any damage. It generally consists of structural members, hydraulics, energy absorption components, brakes, wheels, and tires and provides direct control of the aircraft through the provisions of integrating supportive systems for the aircraft.
