Zion Market Research Methodology

Market Overview:

An item for hand washing that can be used alone or in conjunction with other cleaning stations is a hand sanitizer dispenser. Hand sanitizer dispensers come in various capacities, sizes, and modes of operation. Offices, train stations, and public restrooms are just a few of the places where these gadgets are employed. These gadgets are also typically very user-friendly and require little upkeep. A device that automatically dispenses hand sanitizer in a predetermined amount is called an automated dispenser. They are typically used in conjunction with automatic faucets in public restrooms. They help prevent the transmission of infectious diseases and reduce the amount of sanitizer used. When using the hand sanitizer or washing their hands, the user places their hands in front of the sensor and beneath the nozzle. Additionally, when the sensor is activated, a pump will emit a specific amount of sanitizer through the nozzle. Automatic, hand-operated, and foot-operated dispenser stands are the three types of major hand sanitizer dispensers. Automated and foot-operated hand sanitizer dispensers are most frequently utilized to avoid cross-infection.

Rising awareness regarding health concerns and the importance of sanitization due to the COVID-19 pandemic is one of the major factors driving the growth of the global hand sanitizer dispenser market. Moreover, the government regulations which are promoting the

implementation of hand sanitization in public places are driving the market growth. The large gap between supply and demand of hand sanitizer dispensers due to the sudden increase in dispensers is creating opportunities for existing and new players in the hand sanitizer dispenser market. Whereas a dynamic increase in demand for hand sanitizer dispensers is making it challenging for the manufacturers to maintain the production level.

Individuals interested to learn about the Hand Sanitizer Dispenser market

The global hand sanitizer dispenser market is divided into geographic regions: North America, Latin America, Europe, Asia Pacific, Middle East, and Africa. The hand sanitizer dispenser market in Asia is expected to grow fastest during the forecast period. The COVID-19 pandemic has resulted in a sudden surge in the sales of hand sanitizers and hand sanitizer dispensers. People have adopted different preventive measures such as using hand sanitizers & masks and consuming immunity-boosting supplements to fight against the infection. As the government eased out certain lockdown restrictions, different offices and shops began their operations, increasing the demand for hand sanitizer dispensers significantly. This demand has been leveraged by many local and small-scale manufacturers and several small-business owners to begin manufacturing manual and automatic hand sanitizer dispensers which are suitable for public washrooms, offices, retail shops, airports, hospitals, railway stations, theaters, and other public places.

Recent Development:

In September 2020, DRDO, a part of the Ministry of Defense, India, developed an automatic mist-based sanitizer dispensing unit using its expertise in mist technology for fire suppression.

April 2020: Nycil, a Zydus Wellness-owned talc brand, launched sanitizer products through their 'germ protection for family' product category.

Hand Sanitizer Dispenser Market: Growth Drivers

Increasing government initiatives and regulations to drive market growth

Governments of different countries worldwide took initiatives to promote the awareness of hand sanitization and started campaigns to educate the benefit of hand sanitization as a preventive measure to avoid infections. As the lockdown restrictions were removed to a certain extent, different governments also formulated regulations to use hand sanitizers in public places, further promoting the growth of the global hand sanitizer dispenser market. Moreover, the government regulations which are promoting the implementation of hand sanitization in public places are driving the market growth. The large gap between supply and demand of hand sanitizer dispensers due to the sudden increase in dispensers is creating opportunities for existing and new players in the hand sanitizer dispenser market.

Hand Sanitizer Dispenser Market: Restraints

The presence of substitutes or alternative products hinders the market growth

The availability of substitutes or alternative products such as shampoos, soaps, and oils negatively impact the sales of products related to hand cleansing. The side effects of using alcohol and non-alcohol sanitizers are also expected to hamper market growth.
