

Polish Air Force University Upgrades 29 Aircraft with Rugged Video's EAGLEi 4K Ultra HD Flight Data Recorders

Polish Air Force University to upgrade 23 Diamond Aircraft and 6 Guibal Cabri G2 helicopters with EAGLEi 4K Ultra HD Flight Data Recorders from Rugged Video

CEDARBURG, WI, UNITED STATES, December 22, 2022 /EINPresswire.com/ -- Rugged Video LLC

“

This will lead to an increase of training and safety standards in one of the most modern and quickly growing fleets among comparable units in other European countries.”

Kamil Kruszczyk, Aero Club

announces the delivery of 29 [EAGLEi 4K Ultra HD Flight Data Recording Systems](#) for the Academic Aviation Training Center of the [Polish Air Force University](#) (Lotnicza Akademia Wojskowa). The systems are an upgrade to 29 flight training aircraft including 6 Guimbal Cabri G2 helicopters and a mix of 23 Diamond DA20, DA40, and DA42 fixed-wing aircraft.

Rugged Video completed the project in partnership with Aero Club, a premier Pilatus, Diamond, Piper and Bell service centre in Poland. The avionics contract was

awarded to Aero Club by the Polish Air Force University in early November, 2022.

Seth Gudmundson, Rugged Video's COO, credits the company's operations team for making this project possible:

"We've shifted our operations strategy and invested more in component inventories, allowing us to quickly deliver products at scale. As a result, the complete order shipped to Aero Club only 9 days after the award, which had a contractual delivery window of only 3 weeks."

Kamil Kruszczyk, of the certifying staff at Aero Club, selected EAGLEi 4K for the bid due to its performance as a low-cost alternative to bulkier and more expensive flight data recorders. Kruszczyk said of the project, "this will lead to an increase of training and safety standards in one of the most modern and quickly growing fleets among comparable units in other European countries."

EAGLEi 4K is the industry-first dual-media 4K UHD Class C Airborne Image Recorder (AIRS), giving operators of rotorwing and fixed-wing aircraft a truly affordable, versatile, and high value flight

recording option. The all-in-one unit records 4K UHD Video, aircraft and ambient audio, GPS and inertial data to both internal and removable memory. EAGLEi 4K is accepted as a flight recorder for US Forest Service contracts under solicitations 1202SA22R9201, 1202SA22R9202, 1202SA22R9203 (National Helicopter Support Services MATOC), and with the New Zealand Dept. of Conservation.

Rugged Video also develops and manufactures cameras and recording equipment for aircraft OEMs, and has a full lineup of [HD and 4K UHD video cameras and recording systems](#) for all airborne and rugged applications.
