- Pharmaceuticals and Dietary Supplements
- Functional Foods and Beverages
- Personal Care and Cosmetics

Based on region, the market is segmented into:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

Proanthocyanidins Market Trends

The global marketplace has seen a paradigm change in healthcare from curative practises to preventive management, making it a key growth driver for the business under consideration. Furthermore, customers are searching for a wide range of dietary supplements to help them preserve and improve their overall health and well-being.

The cost of healthcare in developing economies is significantly higher due to higher per-capita out-of-pocket spending on healthcare and the prevalence of communicable and non-communicable diseases. Consumption of dietary supplements has increased as a result of these factors.

Furthermore, rising consumer understanding of the nutritional and therapeutic benefits of natural extracts such as proanthocyanidins has enticed many companies to produce supplements derived from natural extracts such as proanthocyanidins, propelling the market forward. The region's consumer growth is being fueled by a substantial increase in the percentage of the population that is over the age of 65, which has increased the consumption of nutritious foods and increased demand for pharmaceuticals.

Due to a significant increase in demand for proanthocyanidins as dietary supplements, the United States holds the largest share in the country. Furthermore, because of their anti-angiogenic, antimicrobial, and anticancer properties, proanthocyanidins are expected to rise in popularity in the pharmaceutical industry in the coming years.

Key Market Player

The major players in the market are Naturex, Indena Spa, Nexira, Scott Laboratories Inc., Polyphenolics, Natac Group, among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
