The key highlights of the report include:

Market Overview (2016-2026): –

Forecast CAGR (2021-2026): 6%

The global dental implant abutment systems market is predicted to grow in response to the growing popularity of dental implants. Because of its newness, the market for dentures, bridges,

crowns, and other traditional treatments is dwindling as the popularity of dental implants grows.

The increasing willingness to utilize new technology is likely to benefit the global market. An increase in the number of health-conscious people around the world is expected to provide significant market growth prospects.

Industry Definition and Major Segments

The dental implant abutment acts as an artificial tooth root, connecting the dental prosthesis to the implants.

Based on type, the industry is divided into:

- Stock/prefabricated abutment systems
- Custom abutment systems

Based on its technology, the market is segmented into:

- pre-mill
- CAD
- CDM

Based on its end-use, the industry is segmented into:

- Hospitals
- Dental Clinics
- Others

Based on region, the market is segmented into:

- North America
- Europe
- Asia Pacific
- Latin America
- Middle East and Africa

Market Trends

The global dental implant abutment systems market is expected to rise due to an increase in the

use of high-end dental care products. The availability of modern manufacturing technologies has encouraged the creation of dental implants in recent years. The increase of dental product portfolios of manufacturers is expected to suit the expectations of cost-conscious clinicians and patients.

The global dental implant abutment systems market is expected to face increased competition from bargain and value brands, making it difficult for established players to compete. Despite the past market dominance of firms supplying premium dental implant abutment systems, this could be the case. As a result, premium dental implant abutment systems may see a decrease in market share and a decrease in overall price in the near future.

The substantial presence of established brands in the global market, on the other hand, is predicted to aid their domination. In terms of region, North America is expected to lead the worldwide dental implant abutment systems market. In the following years, Europe and other parts of the market may follow suit.

The market for dental implant abutment systems is expected to see potential growth as the prevalence of dental problems rises in North America. Another factor driving demand in the North American dental implant abutment systems market is the rising adoption of CAD/CAM technology for dental implants. Its cost-effective and very easy solution could aid the technology's market penetration.

Key Market Players

The major players in the market are Danaher Corp., DENTSPLY SIRONA Inc., Dynamic Abutment Solutions, Institut Straumann AG, ZEST Anchors LLC, Zimmer Biomet Holdings Inc, among others. The report covers the market shares, capacities, plant turnarounds, expansions, investments and mergers and acquisitions, among other latest developments of these market players.
