

Stroke Management Market to See Booming Worldwide 2022-2028 | Abbott, B. Braun Melsungen, Boston Sci

BURLINGAME, CALIFORNIA, UNITED STATES, December 26, 2022

/EINPresswire.com/ -- A stroke happens when a blood artery in the brain ruptures and bleeds, or when the blood supply to the brain is cut off. Blood and oxygen are unable to reach the brain's tissues due to the rupture or obstruction. Transient ischemic attack, ischemic stroke, and hemorrhagic stroke are the three most common forms of strokes worldwide. A blood test, computed tomography scan, magnetic resonance imaging, ultrasound, cerebral angiography, and echocardiogram are all used to diagnose a stroke. Aspirin, as well as other antiplatelet and anticoagulant medications, are used to treat strokes.

Stroke Management

Stroke Management Market

The increase in healthcare awareness, rise in diabetes prevalence, surge in cigarette users, and growth in the geriatric population are driving the expansion of the [stroke management market](#). Furthermore, technical developments in stroke detection and treatment contribute to market growth. However, the high cost of diagnosis and treatment, as well as a lack of reimbursement policies, are projected to stymie market expansion. On the other hand, continuous R&D activities in the field of stroke management are projected to provide attractive potential for market expansion.

The global Stroke Management market size was valued at \$24,702.20 million in 2021, and is projected to reach \$64,771.95 million by 2028, registering a CAGR of 7.1% from 2022 to 2028.
