## Segmentation:

The denim market is segmented on the basis of product, consumer type, distribution channel and type. The growth amongst the different segments helps you in attaining the knowledge related to the different growth factors expected to be prevalent throughout the market and formulate different strategies to help identify core application areas and the difference in your target markets.

On the basis of product, the denim market is segmented into jeans, jacket & shirts, trousers, dresses, shorts and track pants, jumpsuits, dungarees and others.

On the basis of consumer type, the denim market is segmented into men, women and children.

On the basis of distribution channel, the denim market is segmented into specialty stores, department stores, online, hypermarket & supermarket and exclusive stores.

On the basis of type, the denim market is divided into light denim, medium denim and heavy denim.

Denim is a cloth that is made of cotton that is rough and thick in nature. Denim was originally created for the usage in work clothes and slowly gained its significance as a material that is utilized in other types of apparel. Currently, denim is a vital and fashionable item in every wardrobe. Manufacturing of garments from denim is a profitable business.

Major factors that are expected to boost the growth of the denim market in the forecast period are the rise in the urbanization and increasing trend of denim shirts. Furthermore, the growing popularity of stretchable denim jeans by blending cotton with synthetic material is further anticipated to propel the growth of the denim market. Moreover, the increase initiative by the government to improve the product manufacturing is further estimated to cushion the growth of the denim market. On the other hand, the rise in the prevalence for cheap woollen wear is further projected to impede the growth of the denim market in the timeline period.

In addition, the easy accessibility of raw material and the growing advancement of denim wear will further provide potential opportunities for the growth of the denim market in the coming years. However, the variation in the price of raw material and altering fashion & consumer preference might further challenge the growth of the denim market in the near future.
