Drivers

Rise in dental caries

The ageing population, rising dental caries rates, and other factors propel the growth of the full dentures market. Dentures and implants are gradually adopting CAD/CAM technology, which is anticipated to increase production accuracy and output.

Increase in demand of dentures

The rapid digital creation of detachable full-arch dentures through the use of digital dentures technology is expected to further fuel market expansion throughout the forecast period.

Rise in ageing population

WHO predicts that the number of people will rise to 9.7 billion in 2050 as a result of an ageing population around the world. This is a significant contributing factor to the occurrence of edentulism overall. In recent years, populations in emerging economies have been more likely to get full dentures than partial ones, which has helped the market for full dentures grow.

Opportunities

Increase in the prevalence of dental diseases

The market's growth is fuelled by the rise in the prevalence of dental diseases, which is likely to accelerate the demand for removable or fixed dentures.

The investment made in the study would provide you access to information such as:

Full Dentures Market [Global – Broken down into regions]

Regional level split [North America, Europe, Asia Pacific, South America, Middle East & Africa]

Country-wise Market Size Split [of important countries with major market share]
