Data Bridge Market Research analyses that the global pingueculum drugs market will grow at a CAGR of 7.3% during the forecast period of 2022 to 2029.

The global pingueculum drugs market report provides details of market share, new developments and product pipeline analysis, the impact of domestic and localized market players, geographic expansions and technological innovations in the market. To understand the analysis and the market scenario, contact us for an analyst brief. Our team will help you create a revenue-impact solution to achieve your desired goal.

Pingueculum Drugs Market Competitive Outlook

Acquisitions, partnerships, and collaborations were among the market's inorganic growth strategies. As a result of these activities, Pingueculum Drugs market participants have been able to increase their clientele and earnings.

A pingueculum is a typical conjunctival growth that is not malignant. This is the transparent, delicate tissue that encircles the eye's white region (sclera). Pinguecula word is derived from the Latin word pinguis, which means "fat" or "grease." The growth occurs in the part of the conjunctiva that is exposed when the eye is open. The risk factors for the progression of pinguecula include exposure to ultraviolet light, trauma, wind, dust and sand, working outdoors for a long duration and advancing age. Individuals having a history of elevated UV exposure and those living closer to the equator have a higher incidence (outdoor work). According to certain research, males have a somewhat higher incidence than females, which could simply be due to a higher rate of UV exposure. It appears as a tiny, yellowish bump on the conjunctiva close to the cornea. It may emerge on either side of the cornea.

The Pingueculum Drugs Market Key Players:

Alcon Inc.

Johnson & Johnson Services, Inc.

Novartis AG

Akorn Operating Company LLC

Bausch & Lomb Incorporated

AbbVie Inc.

Prestige Consumer Healthcare Inc.

Spectra Vision Care

Théa Laboratories

Wellona Pharma

SAGER PHARMA

Maya Biotech Private Limited

EYERIS VISIONCARE Pvt. Ltd.

Sylentis

Bayer AG

Zydus Group

Amneal Pharmaceuticals LLC

OASIS Medical

Similasan Corporation

Alcon

Santen Pharmaceutical Co., Ltd.

Pingueculum Drugs Market Segmentation:

The global market research observes a number of significant segments and sub-segments based on requirement, application, end users, and geography to acquire an understanding of the market.

The [global pingueculum drugs market is categorized](#) into seven notable segments based on drug type, treatment, formulation, mode of purchase, population type, end user and distribution channel. The growth amongst these segments will help you analyze meager growth segments in the industries and provide the users with a valuable market overview and market insights to help them make strategic decisions for identifying core market applications.

By Treatment

Artificial Tears/Topical Lubricants

Steroid Eye Drops

Non-steroidal Eye Drops

Others

Based on treatment, the global pingueculum drugs market is segmented into artificial tears/topical lubricants, steroid eye drops, non-steroidal eye drops and others.

By Formulation Type

Eye Drops

Eye Ointments

Others

Based on formulation, the global pingueculum drugs market is segmented into eye drops, eye ointments and others.

By Mode of Purchase

Prescription

Over the Counter (OTC)

Based on mode of purchase, the global pingueculum drugs market is segmented into prescription and over the counter (OTC).

By Drug Type

Branded

Generics

Based on population type, the global pingueculum drugs market is segmented into branded and generics.

By Population Type

Geriatric

Adults

Based on population type, the global pingueculum drugs market is segmented into geriatric and adults.

By End User

Hospitals

Specialty Clinics

Home Healthcare

Others

Based on end user, the global pingueculum drugs market is segmented into hospitals, specialty clinics, home healthcare and others.

By Distribution Channel

Retail Pharmacies

Hospital Pharmacies

Online Pharmacies

Others

Based on the distribution channel, the global pingueculum drugs market is segmented into retail pharmacies, hospital pharmacies, online pharmacies and others.

Pingueculum Drugs Market Study and Strategies Carry Out as below:

The report contains a detailed assessment of major industry players operating in the Pingueculum Drugs Market.

It covers latest development strategies, value chain analysis, and key growth prospects accepted by crucial manufacturers of the global market.

It studies growth-oriented micro and macro-economic indicators.

Assessment of recent Pingueculum Drugs market size, forecast information, and technology improvements within the industry

The research describes current information influencing the strategic scenario and imminent industry trends in the global Pingueculum Drugs Market.

This report estimates the market size and its contribution to the parent market

Assessment of Pingueculum Drugs market Factor Analysis Porters Five Forces, Supply/Value Chain, PESTEL analysis, Market Entropy, Patent/Trademark Analysis

2022-2029 Latest Updated Research Report with Overview, Definition, TOC, Market Key Players Update

The report includes top market players updated in 2022-2029 with their latest business strategy, sales volume and revenue analysis

Rising prevalence of pinguecula disorders and ocular pains

In 2020, according to the published article "Prevalence and associated factors of pinguecula in Western Turkey" by ULAKBİM Journal Systems, the study included 1443 individuals over the age of 20 years of Western Turkey, where it was found that 52.5% of people had pinguecula and out of that 52.5%, the prevalence of pinguecula was higher in males (58.4%), as compared to females (46.8%).

The prevalence of pinguecula disease keeps showing a surge in growth as several environmental and external factors worldwide. Chemical burns and flash burns cause significant and severe ocular pain due to irritations over the eye surface. Thus, the rising prevalence of pinguecula disorder and ocular pain is expected to drive the global pingueculum drugs market in the forecast period.

Rise in chronic UV radiation exposure due to ozone defect

In 2019, according to the published journal by "the Association for Research in Vision and Ophthalmology," it was stated that early pinguecula was found to have a prevalence of 39.5% in the temporal conjunctiva and 43.9% in the nasal conjunctiva respectively. That the reported amount of time spent on outdoor activities was 19.6% and 16.1% for less than 2 hours, 44.7% and 52.2% for 4 to 6 hours, respectively and 75.0% in both fields for more than 6 hours, indicates a positive correlation between the prevalence of pinguecula and the amount of time spent on outdoor activities and UV radiation exposure.

There is a correlation between increased exposure to UV and a higher prevalence of pinguecula. This demonstrates that there is a connection between the prevalence of pinguecula and exposure to sunlight. The ozone layer defect is also leading to an increase in the exposure of UV exposure which is increasing the prevalence of pinguecula disorder. Thus, it is expected to drive The global pingueculum drugs market growth.

Restraints/Challenges

Adverse effects of steroid eye drops

Ophthalmologists or optometrists are recommended by patients with mild to severe pinguecula for a thorough examination and prompt treatment. Most often, local tropical steroids, tropical immune modulators, lubricating ointment, gel, or drops are used to treat them.

Prednisolone is the topical steroid that is most frequently used to treat ocular pain. The prednisolone acetate ophthalmic suspension has below mentioned common adverse effects:

Eyes sting, burn, or itch for one to two minutes after using this medicine
Vision temporarily obscured
Increased light sensitivity
Visual alterations
Experiencing a foreign object in your eyes
Allergic responses
Lack of healthcare facilities for eye treatment
