Grain Farming Global Market Report 2022- Market Size, Trends, And Global Forecast To 2026

As per The Business Research Company's "Grain Farming Global Market Report 2022", the grain farming market is predicted to reach a value of \$1,310.72 billion in 2022 at a compound annual growth rate (CAGR) of 8.5%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, surge in commodity prices, and supply chain disruptions, effecting many markets across the globe. The grain farming market is expected to grow to \$1,792.34 billion in 2026 at a CAGR of 8.1%. Many chemical companies are offering bio-pesticides to control pests, insects, and weeds in farmlands.

Key Trends In The Grain Farming Market

Biopesticides are becoming increasingly popular and are safer than traditional chemical pesticides. Biopesticides are derived from natural materials such as animals, plants, bacteria, and certain minerals. When compared to chemical pesticides, biopesticides are inherently less

harmful and are more target-specific than chemical pesticides.

[Overview Of The Grain Farming Market](#)

The grain farming market consists of sales of grains by entities (organizations, sole traders, and partnerships) that produce grain crops and grain seeds. Grains include wheat, barley, oats, corn, rice, and other grains. These crops are typically grown in open fields and have an annual growth cycle. This market excludes processed grain products such as flour and other products. This market also excludes the proceeds from the captive (internal) consumption of the grains for further processing.
