*The Business Research
Company*

the post-harvest treatment market is predicted to reach a value of \$1.44 billion in 2022 at a compound annual growth rate (CAGR) of 7.60%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions affecting many markets across the globe. The post-harvest treatment market is expected to reach \$2.02 billion in 2026 at a CAGR of 8.70%. An increase in awareness of post-harvest treatments is expected to propel the growth of the post-harvest treatment market.

[Key Trends In The Post-Harvest Treatment Market](#)

Strategic collaboration between companies is a key trend gaining popularity in the post-harvest treatment market. Companies that are into post-harvest treatment are undergoing partnerships

and collaborations to develop new technologies and products. For instance, in June 2020, AgroFresh Solutions, Inc., a US-based company and a leader in the post-harvest treatment industry, announced that it had entered into an agreement to sell \$150 million to Paine Schwartz Partners. This investment will enable Paine Schwartz Partners to move initiatives in the field of post-harvest treatment forward more quickly.

[Overview Of The Post-Harvest Treatment Market](#)

The post-harvest treatment market consists of sales of post-harvest treatment by entities (organizations, sole traders, and partnerships) that refer to a variety of products that are treated before storage in order to reduce spoilage and improve appearance and marketability. Post-harvesting treatment mainly focuses on the treatment methods for fresh fruits and vegetables through crop treatments such as degrading, curing, wax coating, and application of growth regulators. These treatments are also effective in reducing cooling damage in refrigerated storage.
