Streaming Analytics Global Market Report 2022 –  
Market Size, Trends, And Global Forecast 2022-2026

As per The Business Research Company's "Streaming Analytics Global Market Report 2022", the streaming analytics market is predicted to reach a value of \$17.24 billion in 2022 at a compound annual growth rate (CAGR) of 31.5%. The Russia-Ukraine war disrupted the chances of global economic recovery from the COVID-19 pandemic, at least in the short term. The war between these two countries has led to economic sanctions on multiple countries, a surge in commodity prices, and supply chain disruptions, affecting many markets across the globe. The market is expected to grow to \$48.85 billion in 2026 at a compound annual growth rate (CAGR) of 29.7%. The increasing demand for industrial automation is significantly driving the growth of the streaming analytics market.

## [Key Trends In The Streaming Analytics Market](#)

Technological advancement is a key trend gaining popularity in the streaming analytics market. Major companies operating in the streaming analytics sector are focused on developing new

technological solutions to strengthen their position. For instance, in March 2021, KX, a UK-based data analysis software company launched KX Insights, a cloud-based platform for streaming analytics. It uses streaming analytics technology to deliver scalable real-time data insights without the need for complicated upgrades, additional infrastructure, or the need to optimize for different cloud environments.

### [Overview Of The Streaming Analytics Market](#)

The streaming analytics market consists of sales of the streaming analytics software and related services by entities (organizations, sole traders, and partnerships) that automatically process and analyze real-time information. Streaming analytics is the processing and analysis of data records continuously rather than in batches. It allows the setting up of real-time analytics computations on data streaming and also provides language integration with quick and appropriate time-sensitive processing.
