

# Heybike Unveiled One-piece magnesium alloy eBike :Tyson

SPOKANE, WA, USA, December 31, 2022 /EINPresswire.com/ -- [Heybike](#) is excited to announce the launch of their latest one-piece magnesium alloyed app-controlled eBike, Tyson, during [CES 2023](#) in Las Vegas. Tyson is being added to the Heybike family, who is known for being an Amazon best-selling electric bike company on a mission to create the best riding experience while promoting clean, environmentally-friendly travel.

Tyson is the first folding bicycle in its category to offer a powerful 750-watt motor on a unibody design. The whole frame of this e-bike is formed from just one piece of magnesium alloy. This makes Tyson both light and very durable, simultaneously. Tyson's launch comes as Heybike reaches record-high sales, with nearly 300% growth in the last year, and has quickly become an Amazon best-seller, ranking as number three in the e-bike category and number one in the adult folding bike category.

Heybike Tyson Blue 750 w

"We're very excited to launch Tyson during CES 2023. We designed this product to give riders the ultimate in aesthetics and convenience while delivering a riding experience like none other. Tyson is not only gorgeous, it's also strong thanks to the innovative one-piece magnesium alloy construction. As with all Heybike products, riders can feel the superior quality and durability in every aspect of the product. Tyson's unique frame geometry and folding unibody provide strength and aesthetics while also allowing the bike to be smaller and easier to fit into small spaces. All this, plus a powerful 750-watt motor makes Tyson the perfect balance of form and function." said cofounder William Li of Heybike.

## Technical Specs:

Battery: 48V, 15AH (720Wh)

Display: Heybike Connect app

Motor: 750W front hub motor

Pedal Assist: Assist Intelligent 0~5 level pedal assist
