Trending Veterinary Pharmaceuticals Market Trend

The rise of generic drugs for animal care is being seen as the latest trend in the veterinary pharmaceuticals market. The economical nature of generic drugs enables pet lovers to take care of their pets efficiently. The FDA has approved 22 generic animal drugs for cats and dogs, which has increased the adoption of generic drugs by veterinarians. According to a survey conducted on 520 veterinarians by Brakke and Trone Brand Energy Inc., around 80% of the veterinarians confirmed that they are using generic drugs to save the pet owners' money. However, the lower margin of profit given by generic drug manufacturers compared with the heavy margins of branded drugs needs to be looked into by veterinarians.

Veterinary Pharmaceuticals Market Segments

- By Type: Veterinary Vaccines, Veterinary Antibiotics, Veterinary Parasiticides, Other Types
- By End User: Veterinary Hospitals, Veterinary Clinics, Pharmacies And Drug Stores
