

# Metal Finishing Market size is forecast to reach US\$110.3 billion by 2027 - IndustryARC

Metal Finishing Market size is forecast to reach US\$110.3 billion by 2027 after growing at a CAGR of 5.8% during 2022-2027.

HYDERABAD, TELANGANA, INDIA, January 3, 2023 /EINPresswire.com/ -- The Metal Finishing Market size is forecast to reach US\$110.3 billion by 2027 after growing at a CAGR of 5.8% during 2022-2027. Metal finishing refers to the process of placing some type of metal coating onto a substrate to enhance corrosion protection, wear

resistance, durability and add aesthetic qualities. Metal finishing is used in a wide array of industries. The automobile sector is one of the largest markets for metal finishing. This process is used for coating several auto components such as power steering systems, under the hood components, engines, and many other parts for providing the much-needed scratch resistance and enhancing their appearance. The automobile industry is booming globally with increasing production and sales and in turn, this is expected to drive the market's growth during the forecast period. The demand for electronic products like televisions, smartphones, PCs, tablets, printer, microwave ovens, and refrigerators are increasing globally, increasing the demand for semiconductors, contacts, circuits, and connectors, and this is anticipated to propel the growth of the metal finishing market in the forecast period.

# Key takeaways:

This IndustryARC report on the metal finishing market highlights the following areas -

1. The electroplating process dominated the metal finishing market in 2021. This process offers efficient corrosion resistance, and improves electrical conductivity, making it a suitable choice in

the market.

- 2. The electrical and electronics industry is expected to drive the market's growth during the forecast period. For instance, as per the data by India Brand Equity Foundation, 5G smartphones shipment crossed 4 million units in 2020 due to higher consumer demand post-lockdown.
- 3. The Asia-Pacific region will witness the highest demand for metal finishing during the forecast period owing to the booming automobile sector in the region. For instance, according to the stats by India Brand Equity Foundation, the passenger vehicle segment had a growth of 28.39% as sales touched 279,745 units in March 2021 which was 2,17,879 units in March 2020.

### Segmental Analysis:

- 1. Metal Finishing Market By Process: The electroplating process dominated the metal finishing market in 2021. This is one of the most popular metal finishing processes, used widely in a wide range of industries. Electroplating helps in enhancing corrosion resistance, improving wear resistance, and changing the aesthetic of an object. Accordingly, market players and research organizations are involved in the higher uses of this process for metal finishing. For instance, as per the March 2021 journal by SPECTA Journal of Technology, electroplating is one of the processes used for slowing down the corrosion initiation time with nickel being one of the most popular metals used for electroplating.
- 2. Metal Finishing Market By End Use Industry: The automobile industry dominated the metal finishing market in 2021 and is growing at a CAGR of 6.2% during the forecast period. Metal finishing processes such as powder coating and electroplating are extensively utilized in the automobile industry to provide a protective layer on several metal and non-metallic parts of automobiles such as power steering systems, air conditioning components, chassis hardware, engines, and many other applications. The automobile industry is displaying enormous growth due to the increasing production and sales of automobiles and this, in turn, is expected to drive the market's growth during the forecast period.
- 3. Metal Finishing Market By Geography: The Asia-Pacific region held the largest market share in the metal finishing market in 2021, up to 32%. The high demand for metal finishing is attributed to the booming automobile industry in the region. Metal finishing processes such as electroplating and powder coating are used to provide protection to multiple automobile components against premature wear and corrosion. The automobile industry is on a progressive track in the region with high production and sales of vehicles and this is anticipated to increase the demand for metal finishing during the forecast period.

## Competitive landscape:

The top 5 players in the Metal Finishing industry are:

- 1. OC Oerlikon Management AG
- 2. Atotech
- 3. Linde PLC
- 4. C.Uyemura & Co. Ltd
- 5. Honeywell International Inc.

Why Choose IndustryARC?

IndustryARC is one of the leading market research and consulting firms in the world. It produces over 500 unique market reports annually. If you are looking for a detailed overview of a particular market, you can simply connect with the team at IndustryARC. You can not only buy your preferred market report from the website, but also get personalized assistance on specific reports.
