

# Digestive Enzyme Supplements Market Size to Hit \$1.27 billion by 2027 | Exhibit a CAGR of 8.9% (2022-2027)

*The growing disease burden across the globe has been a key driver for the digestive enzyme supplements market*

HYDERABAD, TELANGANA, INDIA, January 3, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that the [Digestive Enzyme Supplements Market](#) size is estimated to reach \$1.27 billion by 2027.

Furthermore, it is poised to grow at a CAGR of 8.9% over the forecast period of 2022-2027. The digestive enzyme's role for the body is to help the system digest food. More commonly they are released by the salivary gland and from the cell lining of the stomach-pancreas-and small intestine. The entire process is completed by breaking the large molecules or complex molecules into smaller ones. The smaller molecule can be taken throughout the body, and thereby helping the functionality. Amylase, as an enzyme is secreted by salivary glands and pancreas and helps in the digestion of carbohydrates. Similarly, lipase is conjured by the mouth-stomach-pancreas and helps in breaking fats into fatty acids and glycerol. Similarly, pepsin is secreted by the stomach and helps break off proteins to peptides and amino acids. Cholecystokinin is a peptide hormone that also helps in stimulating the digestion of fats and proteins. Similarly, trypsin also aids in the digestion of protein. Lactase is responsible for breaking down lactose, and many of the people suffering from such incidence are turned into lactose intolerant. The tendency of consumers for eating outdoor or packaged food owing to the rising urbanization trends along with the rise in digestive relative procedures amongst the growing geriatric population have been the key factors driving the Digestive Enzyme Supplements Industry for the projected period of 2022-2027.
