The key highlights of the report include:

Market Overview (2016-2026)

Historical Market Size (2020): USD 95 billion

Forecast CAGR (2021-2026): 5%

The home care market is being driven by the rising demand for bathroom care, kitchen care, and laundry care products, among others from the household segment. The significant surge in demand can be attributed to the rising standards of living, increasing disposable income, and

innovations in home care products in emerging economies of the world.

The market will further be augmented by the growing need to curb the infections and diseases caused by poor sanitation and lack of maintenance of the house, especially after the COVID-19 outbreak. The growth of the supermarkets and hypermarkets is likely to provide impetus to the market growth, along with the aggressive branding and promotion carried out by the major market players. In terms of region, North America is anticipated to account for a significant share in the market.

The growth in the region can be attributed to the rapid advancements in technology in the countries like the United States and Canada. This includes the emergence of e-commerce industry, which has been bolstering the sales of various home care products. The market in the region is expected to be aided by the growing consumer inclination towards hygiene and sanitation not only in household, but also in hotels, restaurants, schools, colleges, and other institutions.

Industry Definition and Major Segments

Home care is defined as the care provided to the home through various home care products in order to sanitise the house and make the place free from any kind of disease. Home care products are also aimed at maintaining the interior of any commercial or residential building.
