

Tehama Forges Alliance with DLS Technology Corporation to Expand Global Channel Reach

The partnership will enable DLS and Tehama to strengthen the security of its customers' hybrid work deployments.

OTTAWA, ONTARIO, CANADA, January 4, 2023 /EINPresswire.com/ -- Tehama, [provider of the world's first Carrier for Work™](#), today announced that it is expanding its growing network of channel partners around the globe with the addition of DLS Technology Corporation (DLS) to its partner program.

Headquartered in Ottawa, DLS is one of Canada's Top 500 growing companies for four years in a row. As one of Canada's leading technology solutions integrators for both the public and private sectors, with expertise in IT and IT security solutions

for federal, provincial and municipal governments, healthcare, defence and finance sectors, they are the perfect partner for Tehama, as it expands its global reach, DLS has a patented, proprietary cyber security vKey platform that mitigates security threats and risks associated with corporate end users and their endpoint devices. It is one of the Protected B solutions deployed at GoC for Secure Remote Access and Hybrid Workspace.

The way people work has fundamentally changed, and in response, organizations around the world are now realizing they must invest strategically in their [remote and hybrid workforce capabilities](#). Legacy products and traditional approaches are neither tenable nor sustainable.

“Building, securing, and maintaining a hybrid work infrastructure using traditional approaches requires evaluating multiple vendors, going through procurement cycles for each vendor, integrating selected technologies and defining and creating effective management, governance,

audit and risk strategies,” said Mick Miralis, Vice President of Channel Sales, Tehama. “All of this is highly complex, expensive, and hard to maintain, let alone scale. The future of the enterprise desktop is in the cloud, which has profound implications for the future of work itself.”

Tehama revolutionizes how businesses connect to and transmit work through the Tehama Carrier for Work, an all-in-one platform that combines Desktop as a Service (DaaS), Security, Audit, and Networking for seamless hybrid workforce work over IP enablement. Tehama’s ultra-low latency, high-performance solution featuring SOC 2 Type II end-user compute environments (either Windows or Linux), enables enterprises to launch secure cloud work environments for anyone, via any internet connection, on any device - in under an hour. As a result, business outcomes can be expedited when end users are able to access their business-critical data and applications more quickly and reliably.

“

DLS’ vKey solution will integrate with Tehama’s all-inclusive platform to provide a modern and secure hybrid workspace infrastructure for our partners globally, in both public sector or commercial.”

Eric She, President of DLS Technology.

“In teaming with DLS, Tehama is further extending our focus on promoting security and ease-of-use at the endpoint for today’s hybrid work environments,” added Miralis. “Their team specializes in end-to-end architecture, development, deployment, and support for workspace transformation, mobilization, and business digitization. DLS’ tireless efforts in upholding a standard of quality and care and outstanding commitment to security makes them a natural fit as a Tehama partner.”

“We are excited that DLS’ vKey solution will integrate with Tehama’s all-inclusive platform to provide a modern and secure hybrid workspace infrastructure for our partners

globally, whether in the public sector or commercial,” said Eric She, President of DLS Technology.

Provide Contractors, Clients and Employees Secure Access to your Network, in Minutes.

Headquartered in Ottawa, Ontario, Canada, DLS Technology Corporation offers comprehensive technology solutions and services to national clients within the government, healthcare, defence, and finance sectors.

Named one of Canada's Fastest-Growing Companies for four consecutive years, DLS takes a hardware and software-agnostic approach when developing its clients' unique solutions, focusing on delivering comprehensive products that surpass expectations across all verticals with specialization in:

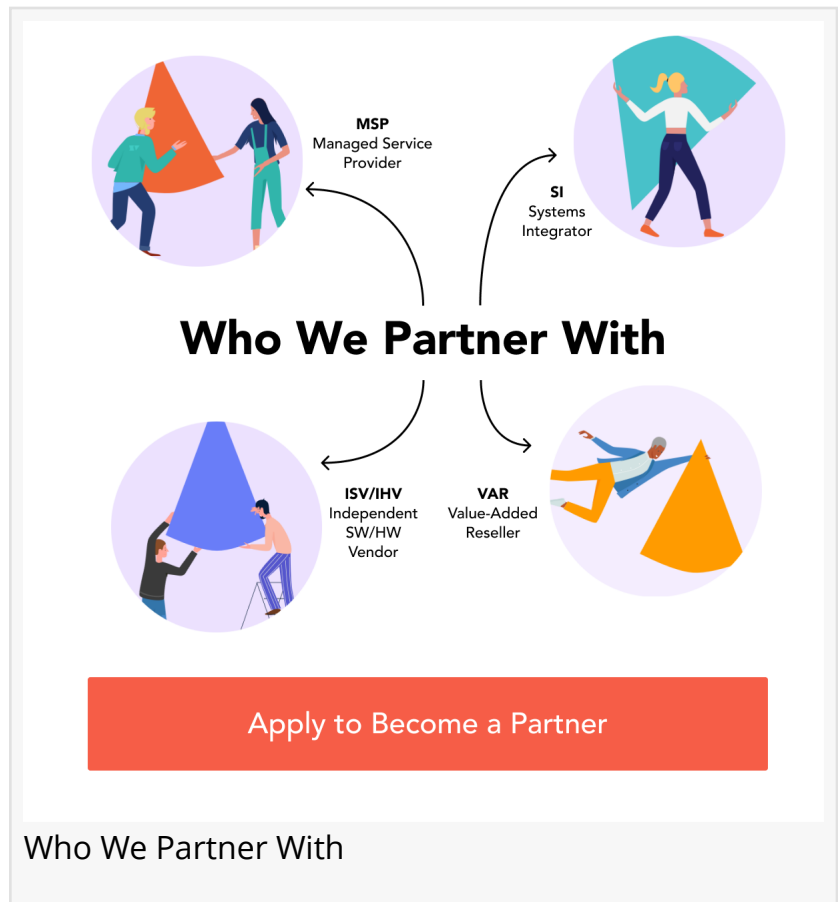

Advanced Data Search and Predictive Analytics
Cloud Computing and Virtualization
Cybersecurity and Zero Trust Network
Endpoint Security and Secure Remote Access
Identity Management and Authentication
Infrastructure and System Integration
Modern Digital Workspace Transformation

DLS' flagship cyber security and corporate management platform, vKey, brings centralized oversight and security to corporate enterprise workforces and their endpoint devices—turning any device into a corporately managed, trusted secure endpoint. This unique platform comprises vKey OS, vKey Device Manager (vDM), and vKey Authenticator (vAuth), as well as integration with any software platforms, allowing enterprises to extend visibility, oversight, and security to the edges of their network and realize their strategic modern workforce objectives by fully leveraging remote and hybrid workforce deployment without risking their corporate data, network, or visibility.
