

Collagen Market worth \$5.7 billion by 2026 at a growth rate of 5.8%- IndustryARC

Increasing Demand for Nutritional Food and Increasing Awareness of Collagen in the Medical Industry.

HYDERABAD, TELANGANA, INDIA, January 5, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Collagen market](#) size is forecast to reach \$5.7 billion by 2026, growing at a CAGR of 5.8% during the forecast period 2021-2026. Collagen is an essential amino acid for the animal body and is the most abundant protein that is found naturally. It is necessary

for healing, tissue formation, regeneration, and healthy wellbeing of an organism. Supplements of collagen can be obtained from bovine, swine, poultry, and other sources. Collagen is used in cosmetic surgeries, treatment of joint pain, and anti-aging treatments among others. It offers both structure as well as strength and helps to repair body tissues and intervertebral discs. It is the most important structural protein in extracellular matrix in the connective tissues of the body. Collagen also serves as a major part of the endomysium. Increasing technological advancements in the healthcare sector and increasing usage of collagen to treat various diseases are the major factors driving the growth of the market. Increasing usage of collagen in food & beverage industry and increasing demand for gelatin is set to further enhance the overall market development of the Collagen Market for the period 2021-2026.
