Trending Cancer Vaccines Market Trend

Companies in the cancer vaccine market are increasingly investing in preventive or prophylactic vaccines for cancer prevention. Prophylactic vaccines are designed to build immunity in a patient. A prophylactic or preventative vaccine involves introducing antigens into a person's

body. According to the World Health Organization, cervical cancer was reported as the second-most common cancer in women, with an estimation of 84% of new cases worldwide. So far, there are 3 HPV vaccines currently available for the prophylaxis of cancer. Two of these will protect against both HPV 16 and HPV 18, which cause 70% of cervical cancer, and the third vaccine prevents 3 more oncogenic HPV types, which further cause 20% of cervical cancers. These three vaccines include Gardasil and Gardasil 9 by Merck and Cervarix by GSK.
