Trending B2B Legal Services Market Trend

Legal service firms are using blockchain to provide a secure way to make transactions and record that transparently. Blockchain is open, distributed ledger that record transactions between the two association or companies efficiently and permanent way. According to a law firm research report in 2020, 41% of law firms will employ blockchain in transactional legal services, 21% for business assistance, and the remaining 31% for high-value legal services. Smart contracts are created digitally and verifiable since they are on the blockchain. Smart contracts help lawyers spend more time on legal advising instead of drafting legal documents. For instance, Chainlink is a start-up that developed technology that relies on data from multiple sources and makes smart contracts more attractive. Blockchain and smart contracts offer several advantages such as secure transactions, transparent records, less paperwork, and more time for advising clients.
