Trending Hydrogen Market Trend

Hydrogen manufacturing companies have started adopting the technology of manufacturing hydrogen from sewage. Hydrogen gas can be manufactured from sewage sludge for use in chemicals, fertilizers, transportation, and manufacturing industries. In this process, the weight of

the sewage sludge is reduced by means of dehydration, followed by incineration, melting, composting, and drying. This process can be used to produce hydrogen on a large scale for supply to the manufacturing and transportation industries. Companies such as Fuel Cell Energy and Graforce Hydro are investing in this technology. Los Angeles Fuel Cell Energy Inc. is one of the hydrogen manufacturers that operates the world's largest 'tri-generation plant' that converts sewage into electrical power and renewable hydrogen for transportation fuel.
