Trending Autonomous Marine Vehicles Market Trend

Maritime drone swarming for better surveillance and investigation capabilities is an emerging trend in the autonomous marine vehicle industry. Maritime drone swarms are a large group of underwater vehicles moving together for a particular purpose. The drone swarm has a wide range of capabilities in defense applications since it is capable of performing surveillance and investigation tasks followed by defensive or offensive countermeasures. As the swarm works collectively to navigate through the underwater environment, it senses a wider area in a shorter time by making use of several sensing techniques to build a comprehensive map of the environment.
