

Rollkers Will Demonstrate Innovative Personal Mobility Device at CES 2023, World's Most Influential Tech Show

Enabling users to double their walking speed, French Startup is seeking strategic partners to advance manufacturing plans

LAS VEGAS, NEVADA, UNITED STATES, January 5, 2023 /EINPresswire.com/ -- [Rollkers](#), a personal mobility device that allows people to reduce their trip times by doubling their walking speed, is set to exhibit this week at [CES](#) in Las Vegas (January 5-8, 2023), from Booth #61049 in Eureka Park in The Venetian.

An innovative product that has been focused on R&D to this point, Rollkers is ready to advance to the next stage of the company's development and will be seeking strategic partnerships at CES, ranging from manufacturing to investment and beyond.

Rollkers can travel at speeds of up to seven miles per hour with a range of 30 minutes making them an ideal complement to public transportation – a fun addition to a daily commute as they are small, lightweight and travel easily, providing truly seamless intermodality. They are also healthier and more environmentally friendly.

Thanks to instinctive control algorithms, users walk naturally, as though on a travelator, with no training required. Using Tracks technology, Rollkers are stabilized with no loss of balance.

Rollkers has created a new video for CES that provides a view of the device in use on the streets of Paris – check it out here: <https://bit.ly/RollkersMedia>

For additional information, please visit <https://www.rollkers.com>.

Rollkers

Double your walking speed
Move up to 7mph

30 min
Li-ion battery for autonomy
2.5mi range

Walk naturally
Like on a travelator

Carry them everywhere
Small and light device

Patented
On all major potential markets

Seamless intermodality
At your feet all trip long

Instinctive control
No training needed

Tracks technology
High stability, no loss of balance

Rollkers Personal Mobility Device is exhibiting at CES 2023 this week
