

Netsweeper to Exhibit at FETC

THE HAGUE, NETHERLANDS, January 16, 2023 /EINPresswire.com/ -- Netsweeper has announced that it will be exhibiting at FETC from January 23-26. This event will occur at the Ernest N. Morial Convention Center in New Orleans, Louisiana. Netsweeper will be exhibiting at booth 2808. Company representatives will be available throughout the conference to demonstrate Netsweeper's products and meet with current and potential filtering customers.

Keeping Students Safe Online and Offline

Schools around the world are seeing an increase in anxiety, depression, and other mental health challenges in their students. Schools are looking for tools that can help identify students suffering from these mental health challenges, as well as minimize distractions and exposure to harmful content.

"Schools have a duty to keep children safe while they're on the internet at school. What Netsweeper does is provide platforms and tools and a safety ecosystem that allows IT managers and guidance departments to be in duty of care while children are on the internet. An example would be alerting a teacher or a guidance counselor when a child is searching how to hurt themselves or how to commit suicide." — Perry Roach, CEO of Netsweeper.

onGuard by Netsweeper empowers schools to provide a safer internet experience for students without overburdening resources. Go beyond the browser to track, analyze, and safeguard content across multiple devices (Windows, Mac, Android, Chrome), online or offline. onGuard alerts to potential risks such as: abuse, bullying, drug misuse, grooming, mental health concerns, pornography, sexual exploitation, and self-harm.

To schedule a meeting at FETC with Netsweeper, contact the company [here](#).

About Netsweeper

Netsweeper is a leading provider of online student safety solutions worldwide. Our suite of digital safety monitoring and network solutions helps schools safeguard students, regardless of how they access the online world. The scale of the internet is larger than any list and larger than any one network. Netsweeper uses advanced AI to identify harmful online content, contact, conduct, and commerce in real-time and alerts administrators to potential risks to student safety. Founded in 1999, Netsweeper has a global presence servicing a network footprint of over 1 billion users. Our US office is located in Dallas, Texas. For more information visit
