

MEGADYNE Introduces MEGASYNC™ Titanium belt

Megadyne's new Flagship High-Performance Power Transmission Belt delivers a new level of performance for Synchronous timing belt drive applications.

ATLANTA, GEORGIA, UNITED STATES, January 9, 2023 /EINPresswire.com/ -- Titanium is a new Megadyne's Flagship High-Performance [Power Transmission Belt](#) which delivers a new level of performance for Synchronous [timing belt](#) drive applications.

The combination of materials and belt design used to create Titanium have been tested against industry-leading belt brands and proven to deliver outstanding results.

The new belt design surpasses the current industries' offerings with e carbon cords, unique cross-linked elastomer construction, and a new low-friction self-lubricating tooth facing. However, one of the most important features is that the belt is anti-static. - Anna Villalta, Global R&D Manager of Rubber Power Transmission Belts

The belt's anti-static features, high-strength cords and wide temperature range make Titanium the right choice for high-performance needs across a broad range of industries and applications such as Oil and Gas, HVAC, Material Handling & Logistics, Agriculture, Wood, Marble & Heavy industry, Textile and Machine Tools.
