

Airport Passenger Screening System Market Size, Trends, Business Opportunities and Forecast 2028 - Douglas Insights

Some of the key market players are ALERT Global Services, CTXSecurity (U.S.), Explosive Detection Systems Ltd. (Israel), Fujitsu Corporation (Japan) more

DOUGLAS, ISLE OF MAN, January 9, 2023 /EINPresswire.com/ -- Airport Passenger Screening System Market Analysis

The airport passenger screening system market is anticipated to grow at a CAGR of **% during 2022–2028, according to a report by Douglas Insights. The increase in air travel and the increasing security measures taken by airports are some of the key factors fueling the growth of this market.

The airport passenger screening system is a system designed to scan passengers before they board planes. Worldwide air traffic has been increasing over the years due to the need for more secure airports. This rise in air traffic has led to an increase in security risks, which is why flight screening systems have become necessary. Improved screening systems at airports are imperative as passengers become a key part of airport operations. With increased efficiency at the airport, improved performance and operability can be achieved. Currently, passenger screening is also receiving more attention from the government and private companies. The passenger screening system can be segregated on the basis of type, i.e., advanced imaging system, explosive detection system, and metal detection system. These innovative systems can also spot undetectable items, including metallic and non-metallic ones.

The future of the airport security market looks promising. Major OEMs have put in a lot of investments to introduce next-generation passenger screening systems, and these are expected to be met with success for travelers. The boom in the usage of advanced imaging systems that is being witnessed currently will further help the global airport passenger screening systems market to grow. Millimeter wave technology, which can see through people's clothing and identify undetectable objects, can also be a significant market player. In addition, rising global security requirements will ensure the long-term expansion and implementation of airport passenger screening systems.

Airport Passenger Screening System Market Keyplayers

Some of the key market players are ALERT Global Services (U.K.), CTXSecurity (U.S.), Explosive Detection Systems Ltd. (Israel), Fujitsu Subo Corporation (Japan), GE Aviation Security Solutions (U.S.), GS4 Limited (Australia), InfraGard Canada Inc. (Canada), MorphoTrust Incorporated (Netherlands), NSI Security Technologies, Inc. (U.S.), and Secure Flight Solutions LLC.(U.S.).

Airport Passenger Screening System Market Segmentations

- By Type
 - Explosive Trace Detectors
 - Metal Detectors
 - Magnetostatic Detectors
 - Full Body Scanners
 - Advanced Imaging Technologies
- By Application
 - Civilian & Commercial Airport
 - Military Airport
