Trending Ethyl Alcohol Market Trend

Companies are increasingly producing ethanol from corn and sugar in the ethyl alcohol market. Ethanol is produced from corn by the dry milling process. In this process, corn kernels are ground into flour or mash, which is then mixed with water. It is purified through distillation and dehydration to create ethanol. The rising demand for liquid fuels in the transportation industry, the global rising demand for oil, and the negative consequences of global warming have contributed to the increased use of corn-based sugar to produce ethanol, thereby reducing global warming gases.

Ethyl Alcohol Market Segments

- 1) By Type: Synthetic, Fermented
- 2) By Application: Industrial Solvent, Fuel/Fuel Additive, Bactericide/Disinfectant, Beverages, Personal Care, Other Applications
- 3) By End User Industry: Automotive, Food and Beverages, Pharmaceutical, Personal Care, Other End Use Industries
- By Geography: The global ethyl alcohol market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
