/EINPresswire.com/ -- The global [Regenerative Medicine Market](#) size was valued at USD 27.06 billion in 2023 and is predicted to be worth around USD 121.45 billion by 2033 with a CAGR of 16.2% from 2023 to 2033.

Regenerative medicine is a broad field that uses a variety of strategies. It mainly involves the use of de novo-created cells and materials as well as various mixtures thereof, to replace lost tissue and contribute to tissue restoration. Regenerative medicine has the main goal of creating replacement tissue and organs for patients who have suffered from an injury or are suffering from a permanent illness. National Institutes of Health define regenerative medicine as creating living, functional tissue to replace damaged or lost organ function or tissue due to age, disease, or other causes.

Regenerative Medicine is a multidisciplinary field that focuses on research and clinical applications. It primarily focuses on the regeneration, repair, replacement, or renewal of cells, tissues, or organs. Regenerative Medicine restores function that has been damaged by any cause. Regenerative medicine can repair or replace tissues and organs damaged by disease, age, trauma, or other causes.
