

Velta Technology Named One of the 2023 Top System Integrator Giants

Velta Technology experienced growth during the pandemic, accelerated during 2022, and has strong momentum heading into 2023.

ST. CHARLES, MISSOURI, USA, January 11, 2023 /EINPresswire.com/ -- Velta

Technology, an industry leader in digital safety and cybersecurity for industrial manufacturing and critical infrastructure environments, has been named to the 2023 list of System Integrator Giants by Control Engineering and CFE Media and Technology.

The 2023 System Integrator Giants (SI Giants) lists the top 80 system integrators among companies listed in the CFE Media Global System Integrator Database, ranked on total system integration revenue. The annual list of SI Giants is released with CFE Media's Global System Integrator Report.

“

To be listed with some of the largest system integrators in North America is a testament to our growth and the importance of the work we're doing around OT digital safety and cybersecurity.”

Craig Duckworth, Co-Founder and President of Velta Technology

“We're pleased to be listed with some of the largest system integrators in North America,” said Craig Duckworth, Co-Founder and President of Velta Technology. “It's a testament to our growth and the importance of the work we're doing around OT digital safety and cybersecurity.”

Velta Technology is an industry innovator when it comes to securing operational technology (OT) and industrial environments. They have developed and offer several

industry leading [digital safety and cybersecurity solutions](#) such as their [SenseR Ready Panel Program](#), [CDV Index](#), OT Monitoring Optimization, and Visibility Study Program.

About Velta Technology

Velta Technology specializes in Digital Safety and Cybersecurity for the industrial space. They understand industrial assets and infrastructure and bridge the gap between Industrial IoT and OT/IT convergence. The Velta Technology team is comprised of multi-disciplinary industrial manufacturing and critical infrastructure experts. They understand the differences between industrial and IT infrastructures and the toolsets required to secure them. They partner with the world's leading solution providers in the industrial space allowing them to integrate digital safety solutions, expertise and tools, with existing technologies.
