Evotix Selected as One of 23 Most Prominent Environment, Health and Safety (EHS) Vendors in Leading Analyst Report

Evotix named as one of the most prominent EHS platform vendors in the Verdantix Green Quadrant: EHS Software 2023 research report and competitive evaluation.

LONDON, January 11, 2023 /EINPresswire.com/ -- Evotix, the world-leading environment, health, safety (EHS) and well-being software company, has been recognized as one of the most prominent EHS platform

Evotix transforms the way employees engage in workplace health and safety.

vendors and positioned as a "Specialist" in the newly released Verdantix Green Quadrant: EHS Software 2023 research report and competitive evaluation. Verdantix compiled the 23 most prominent vendors from the more than 300 active EHS vendors it tracks in the marketplace.

> Evotix's UI-centric and mobile-first approach directly addresses one of the top criteria for customers, making it an attractive choice for customers seeking a user-friendly EHS and learning solution."
>

Based on proprietary Verdantix Green Quadrant methodology, analysis included a 2.5-hour live product demonstration with pre-set scenarios, as well as a vendor response to a 353-point questionnaire covering seven technical, 19 functional and 11 market momentum categories.

"The report highlights key growth areas for our business which align with the top needs of those in the workforce. This further proves the work we're doing is positively impacting the lives of our customers and their employees," said Joe Harmon, chief product officer at Evotix. "We've built a mobile-first solution that is quick to engage employees in safety, using a simple, intuitive interface to help employees identify risk and prevent incidents."

Since the report was last published two years ago, Evotix has experienced significant growth in several key categories:

Mobile: "Evotix's mobile-first EHS software development philosophy resulted in an excellent score of 2.5/3.0 for mobile solutions, 0.6 points above the category average." Understanding that the biggest deterrent to EHS software adoption is engagement, Evotix makes its unlicensed mobile solution available to all users. With a corporate mission to create safer workplaces by getting the tool in everyone's hands, Evotix provides users an easy-to-use mobile-first solution, when they need it, to capture all safety events and actions in real time, ensuring quick issue resolution. A mobile solution is critically important –

only when employees engage with and fully utilize an EHS solution will an organization realize the value of their investment and achieve their EHS goals.

Training: Evotix scored 2.2/3.0 for its microlearning training management solution, Learn. While stand-alone LMS platforms fail to foster engagement, Learn encourages connection "through interaction with material that uses social media-like features, such as likes and comments, as well as gamification techniques such as badges and missions, and a Microsoft Teams integration." The integration of Learn into Assure allows users to upload their own content, assign that content to specific employees and embed learning at the moment it is needed, when starting a task, decreasing the risk of accident or injury.

Contractor Management: Evotix scored 2.2/3.0 for its contractor management module. The dedicated functionality in this module "supports registration of interest and pre-qualification through to approval management and annual reviews. Each contractor record can have an associated supplier status (such as pending, approved or banned) and a supplier rating, which might use a traffic light rating system or be based on the expiry date status of insurances and certifications."

Given these strong capabilities and product growth, Verdantix notes, "Evotix combines EHS and Training into a mobile-first offering well-suited to mid-market buyers." They recommend using Evotix if you're a "predominantly mid-market firm looking for a solution offering functional

strength, usability and price."

"Evotix's UI-centric and mobile-first approach to EHS software directly addresses one of the top criteria for customers, making it an attractive choice for mid-market customers seeking a user-friendly EHS and learning solution," said Christopher Sayers, industry analyst at Verdantix.

While these positive sentiments reflect the power of the Evotix solutions, Evotix also saw an increase in brand preference, moving up a full point from the last report. The company went through a complete rebrand in November 2021, changing its name from SHE Software to Evotix. In addition, it recently launched its "Two Bald Guys Talking Safety" podcast to help educate the marketplace around the importance of health and safety, in addition to building out a resource library full of helpful content to help build a case for EHS software.

ABOUT EVOTIX:
Evotix is a global technology company transforming the way employees engage in workplace health and safety. Its market-leading solution is used by almost 500 customers across a diverse range of industries including manufacturing, food & drink, construction, retail, utility services, transport and housing.
