

Automotive Filters Market Competitive Landscape, Growth Factors, Revenue Analysis - IndustryARC

*Automotive Filters Market Drivers
Stringent Regulations Made by
Government Towards Emission*

HYDERABAD, TELANGANA, INDIA, January 11, 2023 /EINPresswire.com/ -- IndustryARC, in its latest report, predicts that [Automotive Filters Market](#) is expected to reach \$27.09 billion by 2025 at a CAGR of 2.8% during the forecast period 2020-2025. The automotive filters are designed and developed to prevent the entry of dirt particles such as bacteria, exhaust

fumes, pollens, and others into the engine and carburetor. The use of these filters further minimizes the air pollutants that are emitted by the vehicles, thus extending the service life of the vehicle, and reducing the maintenance cost. The government and emission bodies around the world have imposed stringent emission laws for vehicles that emit hazardous gases such as nitrogen oxide (NOx), hydrocarbons (HC), carbon monoxide (CO), and others. For instance, the Environmental Protection Agency (EPA) in the U.S. has amended standards such as fuel economy standards for LCVs and national program for greenhouse gas emissions for light-duty vehicles. Hence these kind of regulations are analyzed to drive the market in the forecast period 2020-2025. The report offers a complete analysis of the market, its major segments, growth factors, trends, drivers and challengers, key players and more.
