Trending Neutropenia Biologic Drug Treatment Market Trend

Companies in the neutropenia biologic drug treatment global market are increasingly investing in developing novel drug delivery systems to improve the therapeutic response of the drug and increase its efficacy. Novel drug delivery systems allow the delivery of a very high dose of drugs directly into the neutrophils, while the systemic dose remains low, thus disabling side effects. For instance, in August 2020, Asalyxa Bio announced its formation and seed funding to accelerate ASX-100 into first-in-human trials in 2021. ASX-100 is a novel spherical particle that releases a safe and effective anti-inflammatory agent, salicylic acid, directly to over-reactive immune cells and is used for treating severe neutrophil-mediated disease.
