Trending Industrial Robots (Warehousing And Storage Robots) Market Trend

The picking process in the warehouse is increasingly being automated with increased demand in the E-commerce industry, to reduce the pickup time of items. The automated robot gathers items and brings them to a central location, where an employee can fulfil orders fast. For instance, Ocado, a British supermarket started using a grid of picking robots in the warehouse that picks the ordered items and delivers them into crates, which are moved onto conveyors and
