<https://www.thebusinessresearchcompany.com/report/orphan-drug-global-market-report>

Orphan drugs refer to drugs that are specifically designed to treat an uncommon medical problem. It might be characterised as medicines that address public health needs but are not produced by the pharmaceutical industry due to financial constraints. Since a chemical may be used to treat a common condition but not have been designed for another, more rare indication, the indications of a medicine may likewise be called "orphan."
