Segmental Analysis:

Acute Cholangitis held the largest share in the disease type segment of the Cholangitis Market in 2019 and is estimated to grow at a CAGR of 3.5% during the forecast period 2020-2025. Acute cholangitis is usually caused by bacteria ascending from its junction with the duodenum. This causes inflammation of the bile duct. Increasing cases of bladder stones and bacterial infection further lead to frequent cases of the disease. Primary Sclerosing Cholangitis (PSC) held the second-largest share in the market, owing to its growing prevalence and far more mortality rate. PSC is one of the leading reasons people require a liver transplant in the U.S. However, it is estimated that Recurrent pyogenic cholangitis (RPC) will be the fastest-growing segment and will register the highest CAGR during the forecast period, owing to growing cases of intrahepatic pigmented stones and recurrent attacks of cholangitis.

Clinical practices hold the major share in the application segment of the Cholangitis Market in 2019. The rising demand for quick and efficient treatments is attributed to the market growth of this segment. The research area is projected to witness steady growth in the forecast period, owing to the increasing need for treatment for intense cholangitis diseases like chronic cholangitis. Chronic cholangitis may be an autoimmune disease in which the body's own immune system mistakenly attacks the bile ducts, causing inflammation. Over time, this inflammation can trigger scars or the growth of hard tissue inside the bile ducts.

North America dominates the Cholangitis Market in 2019, with a share of more than 43%, followed by Europe. The increasing geriatric population along with increasing healthcare awareness and good state-funded regulations have fuelled the Cholangitis market growth in this region.

However, Asia Pacific is estimated to grow at a higher CAGR during the forecast period 2020-2025. This is owing to the developing countries like China and India's anticipation to see reasonable cholangitis cases in face of gallstone disorders and pancreatic cancer, which are further set to drive the demand for gallbladder treatment.

Competitive Landscape:

The top 5 players in the ACholangitis Industry are -

1. Gilead Sciences,
2. RiemserArzneimittel AG
3. Bayer AG
4. Zambon Company S.p.A.
5. Taiho Pharmaceutical Co., Ltd.
