

Boost Payment Solutions Wins 2023 BIG Innovation Award

Boost Payment Solutions was recognized for its work in moving the payment industry forward.

NEW YORK, NEW YORK, UNITED STATES, January 11, 2023 /EINPresswire.com/ -- [Boost Payment Solutions](#) announced today that it was named a winner in the 2023 [BIG Innovation Awards](#), presented by the Business Intelligence Group. The recognition caps off a successful 2023 for the leader in B2B payment solutions.

Rather than simply rewarding interesting concepts, the BIG Innovation Awards recognize people and organizations bringing new ideas and methods to life. By bridging the gap between accounts payable (AP) and accounts receivable (AR) through its B2B payments platform, Boost transforms how large companies pay and get paid for goods and services. Today, more than half of Fortune 100 companies send or receive payments using Boost's patented technology.

Being recognized as a leader in the business innovation space reflects Boost's value of driving the payment industry forward with our technology, expertise and experience."

Dean M. Leavitt, Founder and CEO of Boost

Its pioneering solution, Boost Intercept[®], is the first "lockbox" for virtual cards and provides a secure, streamlined, and automated platform for all commercial card payment processing. As a result, Boost reduces the risk of human error and fraud while enabling straight-through processing (STP). Perhaps most notably, Boost Intercept makes it possible for organizations to accept and reconcile payments automatically and virtually – which became crucial during the COVID-19 pandemic. In addition

to the cutting-edge technology behind it, the wide range of real-world applications of technologies like Boost Intercept[®] set Boost apart from other nominees.

“Innovation is ‘business critical’ in today’s society,” said Maria Jimenez, Chief Operating Officer of the Business Intelligence Group. “We are thrilled to be honoring Boost as they are leading by example.”

Organizations globally submitted their recent innovations for consideration in the BIG Innovation Awards. Following the submissions process, nominees were chosen by a group of business leaders and executives who volunteered their time and expertise to find true innovators among the world’s leading organizations.

“Being recognized as a leader in the business innovation space reflects Boost’s value of driving the payment industry forward with our technology, expertise and experience,” said Dean M. Leavitt, Founder and CEO of Boost. “We’re honored to join this impressive list of winners and are very excited to build upon the success of 2022 throughout 2023.”

About Business Intelligence Group

The Business Intelligence Group was founded with the mission of recognizing true talent and superior performance in the business world. Unlike other industry award programs, these programs are judged by business executives having experience and knowledge. The organization’s proprietary and unique scoring system selectively measures performance across multiple business domains and then rewards those companies whose achievements stand above those of their peers.
