Trending Hand Sanitizers Market Trend

The expansion of production capacities and the revamping of companies to meet the higher demand for hand sanitizers is a major trend shaping the sanitizer industry. For instance, in March 2020, Bell International Laboratories, a vertically-integrated cosmetics manufacturer,

announced the expansion of their production of alcohol-based hand sanitizers (gels and sprays) and is expected to produce 22 million units in April. Moreover, companies such as Radio Khaitan and Bacardi, manufacturers of alcoholic drinks, have turned into sanitant producers amid the COVID-19 outbreak. This step was taken for companies' contributions during the coronavirus pandemic to meet the increasing demand for hand sanitizers for health and hygiene. Therefore, increasing production capacities and companies entering into the production of hand sanitizers is a key trend for the sanitizer market's growth.

Hand Sanitizers Market Segments

- By Type: Quaternary Ammonium Compounds Based, Alcohol Based, Tridosan Based, Other Types
