Trending Water-Based Printing Inks Market Trend

Many companies in the printing ink market are shifting from manufacturing petroleum-based printing inks to manufacturing environmentally friendly printing inks (green printing inks). Unlike petroleum-based printing inks, green printing inks do not contain heavy metals or other dangerous or toxic substances, so they do not cause excessive pollution in landfills. Green printing inks are based on sustainable materials such as soy and other plant-based origins, which are more sustainable than petroleum. Examples of green printing inks include water-based and oil-based printing inks. The use of green printing inks results in a reduction of volatile organic compounds (VOCs) released during the printing process. Major players in the printing ink market such as DIC Corporation, Flint Group, Sakata Inx, and others are providing green printing inks as part of their offerings.

Water-Based Printing Inks Market Segments

- By Product Type: Acrylic Water-Based Inks, Maleic Water-Based Inks, Shellac Water-Based Inks
- By Type: Flexo Inks, Gravure Inks, Screen Printing Inks
- By Application: Packaging Industry, Textile Industry, Art, Other Applications
- By Geography: The global Water-Based Printing Inks market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.

<https://www.thebusinessresearchcompany.com/report/water-based-printing-inks-global-market-report>

Water-based printing inks are referred to as aqueous inks and are available as dye and pigment inks. They are not waterproof and fade in UV light. The use of water-based printing inks has been limited due to compatibility with substrate materials, but they are successfully used for printing on fabric, paper, and some plastics.

Water-Based Printing Inks Global Market Report 2023 from TBRC covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Water-Based Printing Inks Global Market Report 2023 by The Business Research Company is the most comprehensive report that provides insights on water-based printing inks global market size, drivers and trends, water-based printing inks global market major players, competitors' revenues, market positioning, and water-based printing inks global market growth across geographies. The water-based printing inks global market report helps you gain in-depth

insights on opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
