## Trending [Injectable Drug Delivery Devices Market Trend](#)

The companies in injectable drug delivery devices are increasingly focusing on the manufacturing of auto-injectors. The auto-injectors are fully automated, highly customized, and reusable injectors that can be used by a patient to perform hundreds of injections. Patients can control the speed of dose delivery to help minimize pain or discomfort during injection. These devices can adjust the speed and depth of the automatic injection. For instance, LISA, a reusable auto-injector manufactured by Unilife corporation comes with an array of highly customizable features including Bluetooth LE connectivity, Wi-Fi or 3G connectivity, and pre-injection drug warming for target therapies. The injectable drug delivery technology market is expected to show significant growth in the coming years, due to various technological advancements and new product launches to improve the convenience and ease of administration of parenteral therapeutics.

## [Injectable Drug Delivery Devices Market Segments](#)

- By Type: Conventional Injectable, Pre-filled Syringes, Auto-injectors, Pen-injectors
- By Application: Autoimmune Diseases, Hormonal Disorders, Oncology, Orphan Diseases, Pain Management, Respiratory Therapy, Other Applications
- By End User: Hospitals And Clinics, Home Healthcare Settings, Pharmaceutical And Biotechnological Companies, Research Laboratories, Other End Users
